

**Please note that each procedure listed on the PFT Lab order has a specific CPT code attached, and certain tests are not to be scheduled together. Please select only what you are ordering, as each test is a stand alone test and has specific time attached for scheduling.**

**When scheduling the Complete Pulmonary Function test, it includes already in the test:**

1. Bronchodilator study. (Simple Spirometry with and without bronchodilator)
2. Lung volumes. (Plethysmography, or N2 Washout)
3. Diffusion Study

**When ordering individual tests, you can only order spirometry as one order, and is either ordered as spirometry with bronchodilator or just simple spirometry. Stand-alone tests include:**

1. Simple Spirometry
2. Bronchodilator Study
  - a. Includes:
  - b. Simple Spirometry, done with and without bronchodilator
3. Diffusion Study (Do not order if you have already ordered the complete pulmonary function test)
4. Methacholine challenge test.
5. Six-minute walk test.
6. FeNO breath test
